

GUIDE FOR AUTHORS

Submission of Manuscripts

All manuscripts should be submitted to:

Pakistan Journal of Chemistry

Department of Chemistry,

University of Karachi,

Karachi-75270, Pakistan.

Website: <http://chempublishers.com/>

Editor in chief: editor_pjc@chempublishers.com

Technical Editors: technical_pjc@chempublishers.com

Authors are encouraged to submit their manuscripts via E-mail. In the case of hardcopy submission, three copies must be provided, one of which should be a top-quality original, laser-printed on quality paper (size A4).

Types of Manuscripts

Accounts are summaries of significant recent research work and new developments from the research group of the principal author. Photographs and resumes of all authors will be included. Full Papers and Notes report research of high scientific quality and originality that must be either of current general interest or of great significance to a more specialized readership. Both contain experimental details. Communications are brief reports. The results must be of great significance and urgency, and must contribute to the development or further development of an important area of research. Cover letter must be from the senior most author. In the cover letter, the author(s) should briefly state why the results are of highest urgency.

Manuscript Styling

Authors are encouraged to consult recent issues of the journal for examples of format. All manuscripts must be typed doubly spaced and in 12 pt Times New Roman (including footnotes, references, tables, figures and legends). Margins of at least 2 cm must be left at the top, bottom, and left-hand side.

All pages of the manuscript should be numbered consecutively. Manuscript must be written in clear and concise English. The responsibility for all aspects of manuscript preparation rests with the authors. Extensive changes or rewriting of the manuscript will not be undertaken by the Editors. For clarity manuscripts should be subdivided into sections such as Introduction, Experimental, Results and Discussion, Conclusions, Acknowledgement, and References. All manuscripts should contain a graphical abstract. Authors are required to provide a separate sheet containing a small diagram or other informative illustration (scheme, formula, figure, etc.) showing the most important aspect of the paper. The words or sentences in the diagram must be concise. The title should clearly and accurately indicate the contents of the paper and be expressed in adequate scientific terms. The full name(s) of the author(s) and full postal address(es) of the institutions where the research was done should appear under the title.

Use the symbols a, b, c, etc., as superscripts to relate the authors to the corresponding address and an asterisk to indicate the author(s) to whom correspondence should be addressed. In order to speed up the reviewing and publication process, authors are requested to provide their telephone number, FAX number and E-mail address. Authors of Accounts, Full Papers, Notes and Communications, are required to submit a short abstract (even though Communications

abstracts are not to be published in the journal). Abstracts should briefly state the reasons why the work was conducted, the significant results and conclusions. Chinese authors are to provide three copies of the

abstract in Chinese. Please provide 3-10 keywords or phrases that will assist readers and indexes in cross-indexing this study. Footnotes may contain the source(s) of financial support. Tables should be used only in case they present information more effectively than running text. Figures and graphs should be carefully prepared line drawings printed on plain white quality paper. Formulae and Equations. Subscripts and especially superscripts should be written with care and exponents should be set up in single line, e.g., $e^{-60/RT}$. Organic structural drawing should be submitted in a form suitable for direct photographic reproduction and should fill space economically. Do not use structures when a simple formula will suffice. Do not use multiple lines unnecessarily.

Analyses and Spectral Data

The physical and chemical parameters of new compounds should be given in the following order and style: m.p. 239—240 °C, $[\alpha]_{D}^{25} +134.4$ (c 0.50, CH₃OH), $D_{20}^{25} n 1.3941$; UV-vis (EtOH) λ_{max} : 238, 258 nm; ¹H NMR (CDCl₃, 300 MHz) δ : 0.78 (t, J=8 Hz, 3H), 1.07 (d, J=8 Hz, 3H), 2.96 (s, 1H), 3.80—4.00 (m, 1H), 6.90—7.10 (m, 1H); IR (KBr) ν : 3420, 3380, 1675, 1683, 1610, 1588, 1500 cm⁻¹; MS (70 eV) m/z (%): 525 (M⁺, 46), 507 (30), 43 (100). Anal. calcd for C₁₂H₁₁N: C 85.70, H 6.55, N 8.27; found C 85.24, H 6.56, N 8.15 (HRMS calcd for C₁₇H₂₀O₂ 266.1458, found 266.1460).

Crystallographic data should be given in an order as follows: monoclinic, space group P2₁/n with cell dimensions of a=1.2342(2) nm, b=1.862(2) nm, c=1.0042(2) nm, $\beta=105.80(1)^\circ$, V=2.2205 nm³, Z=2, $\rho=15.854$ cm⁻¹. Nomenclature must be consistent, clear, and unambiguous, and in keeping with the rules established by the International Union of Pure and Applied Chemistry, the International Union of Biochemistry, and Chemical Abstracts Service. Personal acknowledgments will be published. References to the literature and all notes regardless of their nature (except those in tables) should be numbered in a consecutive manner.

References

Literature references should be arranged and formatted as follows:

1. Ahmed, T., Azmat, R., Uddin, F., *Chin. J. Chem.*, (2010), 18, 8234.
2. Wu, H. S., Zhou, W. L., *Acta Chim. Sinica*(1997), 55, 453 (in Chinese).

Final/Revised Version

Authors will be informed of the Editor-in-Chief's recommendation as soon as the corresponding referee reports have been received. Authors should respond to the referees' comments and return the revised version without delay, or let the editorial staff know immediately if the response is likely to be delayed. Three months after requesting the revision, a revised manuscript will be handled as a new submission. Authors should answer the comments one by one in a cover letter, and highlight the corrections made in the manuscript in red. The final accepted version of the manuscript should be submitted on disk or by E-mail in these formats (doc, docx, odt, rtf).

Proofs and Reprints

Checking of the page proofs is solely within the author's responsibility. Please follow the instructions accompanying the proofs. All corrections, revisions, and additions must be made directly on the proofs. In particular, check all tables, equations and formulae. No article will normally be released for printing until the author's proof has been received. The Editors, however, reserve the right to give the imprimatur for publication if the corrected proofs are not returned to the Editorial Office in the given time limit. Extensive changes have to be avoided, but if necessary, must be subject to editorial review. A charge will be assessed to cover all expenses incurred with such extensive changes.

Fees and Page Charges

Note for authors located in Pakistan: The manuscripts should be accompanied by a registration fee of PKR 10,000/= . For authors located outside Pakistan: The manuscripts should be accompanied by a registration fee of 150\$ (USD), to cover publication expenditure. Payment is expected but not a condition for publication, since articles are accepted or rejected solely on the basis of merit; the editor's decision to publish a paper is made before the charge is assessed.

We look forward to the submission of your next manuscript.

Contact

Please feel free to contact us for any comments, questions or feedback. In addition, we are always interested in any publication proposals for books, electronic products, new journals and co-operation for existing journals.
